

# ***Let's create a shuttle bus in Randolph!***

Wouldn't it be great if you could walk to a shuttle bus near your home, and ride it every morning to the Braintree T station or the Holbrook Commuter Rail station?

Wouldn't it be great if there were a reliable shuttle bus to go shopping, or a means for our kids to go visit their friends across town?

There are many housing complexes in town that are well over a mile walk to the nearest MBTA bus stop and even further from other community resources. Residents must pay the high cost of maintaining a car -- but with a shuttle van we can reduce the need for cars just to get around town -- reducing costs and reducing traffic too.

***We propose a shuttle van that connects housing complexes with transit hubs, workplaces, and community resources*** -- and we're asking for your signature on our petition to get a shuttle van set up.

There are state-funded programs for "Mobility Hubs" like this -- our petition requires the Town of Randolph to figure out the funding and then set up a "Mobility Hub."

This petition is part of a program to make public transportation equitable, safe, reliable and affordable. Other programs include:

- Work with the BAT to get the BAT #12 bus to pick up and drop off passengers in North Randolph
- Fare-free MBTA bus for routes #240 and #236 in Randolph -- like the 2-year experiment going on in Boston right now.
- Low Income Fare Bill (HD 3417/SD 1550) to permanently reduce the cost of public transit.

***Please sign our petition*** and please tell your neighbors and friends -- and please volunteer to help us get more signatures -- we need a lot!
